Nurse Practitioners

Description

A nurse practitioner is an advanced practice nurse that helps with all aspects of patient care, including diagnosis, treatments and consultations. They may work in both inpatient and outpatient situations and can perform independently or as part of a treatment team. Generally, nurse practitioners perform the important task of educating patients about preventative care and prescribed treatments. They may also conduct physicals, order tests and serve as a patient's primary healthcare provider. Some nurse practitioners are also able to prescribe medications.

Responsibilities

Although there are common duties and responsibilities for all nurse practitioners, they generally vary by specialty. Specialties include primary care, pediatrics, geriatrics, oncology and psychiatric care.

Qualifications

Nurse practitioners can work in a variety of healthcare specialties and will enjoy strong job prospects over the next decade, but the position requires several college degrees and a significant amount of training.

Job Benefits

Medical Allowance, Travel Allowance, HRA, Education Allowance, 30 Days paid leave and many other perks.
