PHP Developer

Description

As a PHP Developer, you will be responsible for developing and maintaining web applications using PHP and MySQL. You will work closely with the design team to create a user-friendly interface and ensure that the application is secure and scalable. You will also be responsible for testing and debugging the code to ensure that it runs smoothly.

Responsibilities

Your typical responsibilities as a graphic designer include:

- meeting clients or account managers to discuss the business objectives and requirements of the job
- estimating the time required to complete a job and providing quotes for clients
- developing design briefs that suit the client's purpose
- thinking creatively to produce new ideas and concepts and developing interactive design
- using innovation to redefine a design brief within time and cost constraints
- presenting finalised ideas and concepts to clients or account managers
- working with a range of media, including computer-aided design (CAD), and keeping up to date with emerging technologies
- proofreading to produce accurate and high-quality work
- demonstrating illustrative skills with rough sketches and working on layouts ready for print
- commissioning illustrators and photographers

- working as part of a team with printers, copywriters, photographers, stylists, illustrators, other designers, account executives, web developers and marketing specialists.

Qualifications

Relevant subjects and disciplines in design degree include those that

- 3D design
- communication design
- film/television
- fine art
- graphic design
- illustration
- photography
- visual art.

Any degree in design or related field will give you a good grounding and background in design. However, a degree is not a requirement for this job. Any experience in design is a plus. A portfolio is essential qualification isn't needed, but pre-
